In order to check the version of the android app on Google Play Store you need to download and install the apk on your phone. Google Play Store is a free service you receive from Google and you pay for to purchase from Google Play. This apk download file has a list of downloaded apks for your Android phone. The apk you need to find, is called AOSP-11.apk .. When you are ready to install it on your phone you need to select from the screen to install apk, click on the green button.. 4) New icons for all your favorite launchers - There are new launchers that are specially designed for Android and are optimized for the OnePlus 3. Like we said earlier, this one's also a fast app to launch. Just swipe up to get ready for your action. So go get used to your next favorite launcher!.. Android version of the app is now listed in the list. You are now ready for the apd.. 2) Customization - You can add your own app icons to the app, custom design icons, etc. That's a lot of extra features for a low price. Not even a chance because your phone isn't fast enough to do it? A little help? The "Customize" button in the launcher will allow you to configure how many APK images each app should have (in addition to their theme!).. I'll explain it all in a couple of words. What is that "Bigger, Faster, Better" bit? Well, that's Code Gen. It's a huge feature we wanted to bring for many reasons such as:.. 1.4 A very fast, powerful & comfortable APK with a lot of features. You will find many, many useful and popular apps to make your life easier on your Android device. It is an extremely useful app and one of the best APK's on the Play Store. So take advantage of it!..
